

Cover Letter Claims and Evidence

Directions: As you read your selected cover letter, take notice of the claims that are made and the evidence that is used to support those claims. Fill in the chart below for the main claims that you see and the evidence that is provided to “prove” those claims.

If more evidence is needed to substantiate a claim, you can discuss why and offer a suggestion of what could be added to strengthen this point.

When you are done, you can save this document and upload it as an attachment to a reply to the in-class activity prompt.

Claim	Evidence
<i>Example: Research Experience</i>	<i>Example: Description research project on genetic modeling conducted in Professor Smith's lab, use of technical language, detailed discussion of processes</i>
